

MACROMITE

480 g/L BIFENAZATE

for the control of two-spotted mite, European red mite and bryobia mite in pome fruit and stone fruit.

Check out overleaf for details.

SureFire®

MACROMITE

MITICIDE

SureFire MACROMITE Miticide is a selective miticide for the control of plant-eating mite pests on apples, pears, apricots, nectarines, peaches and plums.

When used as directed and applied to the foliage, it provides quick knockdown through contact activity, and good residual control.

Due to its unique chemistry, mode of action and selective nature, SureFire Macromite Miticide is relatively inactive against beneficial and/or predatory mites and insects and therefore is compatible with IPM and resistance management programs.

Crop	Pest	Rate	WHP	Critical Comments
Apples & Pears	Two-spotted mite (Tetranychus urticae)	Dilute spraying 65 mL/100 L	Harvest 7 days	Surefire Macromite Miticide should be applied to the point of run-off as soon as mites appear.
	European red mite (Panonychus ulmi)		Grazing 28 days	
Apricots, nectarines, peaches & plums	Bryobia mite (Bryobia rubrioculus)		Harvest 3 days	Equipment should be calibrated so that no less than 1000 L of water is applied per hectare.
			Grazing 28 days	

Container sizes:	Carton quantity:
1 litre	5
5 litre	4

Only one application should be applied per season for effective insect resistance management.

GROUP UN INSECTICIDE

APVMA Approval No: 81158/102445
