TANK CLEANER

SPRAY TANK CLEANER AND DECONTAMINATOR

An advanced liquid formulation containing chelating agents, surfactants, detergents and sequestrants, that has been especially developed as a Spray Tank Cleaner for Australian conditions to remove a wide range of difficult-to-remove agricultural chemicals, deposits and oily residues from tanks, hoses, booms, mixing and transfer systems, nozzles, filters and screens.

GENERAL INSTRUCTIONS DECONTAMINATION PROCEDURE

SITUATION	USE RATE (TANK CLEANER in clean water)	COMMENTS
Cleaning and Decontaminating of Spray Equipment	250mL/100L	Use TANK CLEANER for the removal of residues and decontamination of spray equipment when switching from one herbicide to another, or from a herbicide to a fungicide, fertiliser or insecticide, and at the end-of-season sprayer cleanout.
Spray Tank Size	Use Per Tank Size	
500 L	1.25L	For tanks with unknown contents or cleaning history soak all internal surfaces, lines, filters, nozzles, etc. for at least 24 hours in TANK CLEANER solution at the label rate.
1,000 L	2.5L	
2,000 L	5L	NOTE: For extra 'sticky' combinations (e.g. carfentrazone-ethyl/glyphosate, Valor [®] /glyphosate, etc) the cleaning solution should remain in contact with all internal surfaces of the spray equipment for at least 24 hours to increase product residue removal.
3,000 L	7.5L	
4,000 L	10L	
Nozzles, non-drip diaphragms, screens and filters	25mL/10L	Wash components separately in a bucket

This procedure must be followed for all equipment used in the spraying process, including venturi style hoppers, pre-mix tanks, transfer systems, suction hoses, filters, tanks, tank lids, strainer baskets, booms, spray lines, nozzles, etc.

1. **Drain** all spray equipment. **Wash** the outside of the spray equipment with a label rate solution of **TANK CLEANER** to remove any product contamination.
2. **Rinse or pressure clean** the inside of all equipment with at least 1/10 of tank capacity of clean water and drain.
3. **Half fill the spray tank with clean water and add the total tank label rate of TANK CLEANER.**

Start agitation and flush all equipment for a few seconds, with boom-end valves open and/or bungs removed. Close boom-end valves and/or replace bungs, then stop flow to boom and completely fill tank with water. Allow to stand for at least 15 minutes (or 24 hours for certain combinations – See **NOTE** in Direction for Use Table) with the boom closed and agitation running, then flush all of the solution out of the spray tank via the boom, lines and nozzles.
4. **Clean separately with a fresh solution of TANK CLEANER and water at the rate of 25mL in 10L** all other components such as nozzles, non-drip diaphragms, screens and filters.
5. **Do a final clean water rinse** after following the **TANK CLEANER** cleaning process above.

STORAGE AND DISPOSAL

Store locked up. Away from food, drink and animal feed stuffs. Keep out of reach of children. Keep in original container, tightly closed, in a dry, cool, well ventilated area out of direct sunlight.
Avoid release to the environment.
Rinsate should be disposed of by spraying onto a crop approved for the product(s) being removed from the spray tank, or via an alternative approved method.

SAFETY DIRECTIONS FOR OPERATOR PROTECTION

Harmful if swallowed. Irritating to eyes and skin. Wear suitable gloves and eye/face protection. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

CONDITIONS OF SALE

PCT International Pty Ltd and its agents and/or distributors, shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of PCT International Pty Ltd for breach of any such statutory warranties and conditions cannot be lawfully excluded but may be limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of PCT International Pty Ltd for any breach of such statutory warranty or condition is so limited.

IN AN EMERGENCY DIAL 000 POLICE OR FIRE

Contains: Benzenesulfonic acid, mono-C10-13-alkyl derivs., compounds.
with ethanolanine 20-30%
2-aminoethanol 5-10%
Alcohols, C12-15, ethoxylated (C12-15 PARETH-7) 3-5%

USE ONLY OUTDOORS OR IN A WELL-VENTILATED AREA.

DANGER

Causes severe skin burns and eye damage.

May cause respiratory irritation.

Harmful to aquatic life with long lasting effects.

Wear protective gloves/clothing and eye/face protection.

Avoid breathing spray.

Wash hands thoroughly after handling.

Wash contaminated clothing before re-use.

IF SWALLOWED: Rinse mouth. DO NOT induce vomiting.

IF ON SKIN (or hair): Remove all contaminated clothing immediately. Rinse skin with water/shower.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre.

Phone Australia 13 11 26.
