

# SPECTRUM 200SC

## termiticide

- because  
subterranean  
termites are  
never too far  
away!

# SPECTRUM 200SC

## termiticide

Surefire Spectrum 200SC, containing 200g/L Imidacloprid, is now registered for use in the control of all species of subterranean termites (including *mastotermes darwiniensis*) in both new and existing buildings.

Surefire Spectrum 200SC has these features to assist you with your termite management work:

1. A non-repellent application which binds readily to soil.
2. Can't be detected by termites, greatly assisting with colony control & elimination.
3. Easily applied with your existing treatment equipment.
4. Unbeatable value when compared to other non-repellent termiticides & other liquid temiticides.

Container sizes:	Carton quantity:
500ml	10
1L	5
5L	4
20L	32-pallet
