VISTA* 200SC

INSECTICIDE

ACTIVE CONSTITUENT: 200 g/L FIPRONIL

Surefire VISTA 200SC Insecticide, containing 200g/L Fipronil, is now registered for use in the control of many pests in asparagus, brassicas, cotton, ginger, wine grapevines, potatoes, sugarcane, swedes and turnips & bananas.

TYPICAL APPLICATIONS:

Brassicas:

Ensure thorough coverage of foliage and heads.

Cotton:

For ground application use a prepared spray volume of 35- 75L/ha depending on the size of the crop. For aerial application see Aerial application instructions on the label.

Wine Grapevines:

Surefire Vista 200SC Insecticide should be applied by hand held equipment as a high volume directed spray of approximately 500ml solution per vine.

Potatoes, Sweet Potatoes:

Apply as a broadcast spray to the surface of the soil and incorporate to a depth of 15 cm prior to planting.

Swede and Turnip:

Ensure a thorough coverage of foliage.

Bananas:

Registered for control of banana rust thrips & weevil borer.

**bananas now
on the label!**
