

Subject: Upcoming Chlorpyrifos Label Use Restrictions – Transition Planning & Alternatives

Dear Supplier,

On 3 October 2024, the APVMA released its final decision regarding the future use of chlorpyrifos in Australia. As part of this outcome, a 12-month transition period has been granted. During this time, registered chlorpyrifos products may continue to be supplied and used under existing approved labels until 30 September 2025.

What Happens After 30 September 2025?

After 30 September 2025, continued supply, possession, or use of chlorpyrifos products outside the **revised approved uses** will not be permitted under the APVMA Code. PCT International will continue to supply Surefire Fortune 500 under **the approved label**.

Please note: PCT International will not be accepting returns of chlorpyrifos-based products sold during the transition period.

Recommended Alternatives

To help ensure a smooth transition, we encourage customers to consider the following chlorpyrifos-free alternatives in professional, rural, and domestic use settings:

Cropro Zeus EC (Bifenthrin 100 g/L)

- Broad-spectrum, non-repellent insecticide
- Targets: Funnel ants, Argentine stem weevil, lawn armyworm, and cutworm
- Effective for turf, lawns, and a variety of surface-dwelling pests
- Easy-to-use EC formulation, IPM friendly

Surefire Fivestar (Bifenthrin 80 g/L)

- Higher-concentration bifenthrin product for larger-scale or heavier infestations
- Strong residual control and flexible application across different environments

Surefire Fortune Ultra (Bifenthrin 100 g/L)

- For foliar and soil application
- Ideal where contact-based control is insufficient or longer residual action is needed

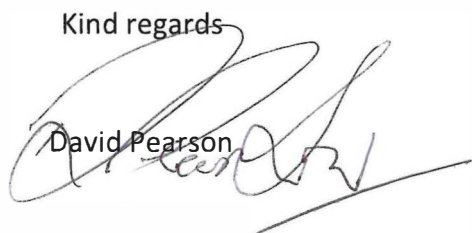

Surefire Spectrum 200SC (Imidacloprid 200 g/L)

- Systemic alternative for foliar application
- Effective as a soil application against soil insects like termites

We encourage you to start preparing for the upcoming changes by phasing out the use of chlorpyrifos products where possible and supporting the uptake of these high-performing alternatives.

For more information or assistance in selecting the right product, please contact your local PCT Territory Manager as below.

Kind regards

David Pearson
